

Solar container energy storage system in Aarhus Denmark

Overview

What is Danish Center for energy storage?

Danish Center for Energy Storage, DaCES, is a partnership that covers the entire value chain from research and innovation to industry and export in the field of energy storage and conversion. The ambition of DaCES is to strengthen cooperation, sharing of knowledge and establishment of new partnerships between companies and universities.

How can Denmark develop a new energy technology?

If Denmark shall succeed in the development and implementation of new energy technologies such as energy storage and conversion, a broad knowledge of political and legal frameworks, economic models, the role of civil society as well as new forms of organization and collaboration across sectors and disciplines is necessary.

What is a battery storage project?

Our goal is to build an integrated business where technology, power trading, and development work together to create long-term value. Initiating a battery storage project involves ensuring proximity to the grid's transmission level, with a screening process initiated with grid operators to assess available capacity.

What is thermal energy storage?

Thermal energy storage comes from storing energy from renewable energies in the form of heat, which in then can be used in district heating systems or be re-converted to electricity through a turbine. The heat can be stored in rocks, water, molten salts, or other phase-changing materials.

Solar container energy storage system in Aarhus Denmark

[Denmark: Solar park with storage for grid ...](#)

A 10 MW lithium-ion battery system is expected to be installed by the end of 2024 at Better Energy Hoby solar park on Lolland in Denmark.
