

# Solar container lithium battery packs exported to the United States

## Overview

---

Is the lithium-ion energy storage battery manufacturing industry growing?

The confluence of these trends in employment, sales, prices, imports, and exports likely indicates the growth of the lithium-ion energy storage battery manufacturing industry in the United States in recent years.

Do federal agencies collect data on lithium-ion energy storage batteries?

The federal agencies that collect and publish data on prices, sales, employment, production, imports, and exports of batteries do so at an aggregation, periodicity, or quality that may not provide sufficient visibility to monitor the advanced lithium-ion energy storage battery industry.

Which countries import lithium-ion batteries?

Lithium-ion batteries power various technologies, from smartphones to electric vehicles and grid storage. China dominates the global lithium battery supply chain, producing over 75% of the world's lithium-ion battery cells. The U.S. imports nearly 70% of its lithium batteries from China, making tariffs on these products highly impactful.

Are lithium-ion energy storage batteries a competitive threat?

U.S. import and export data on lithium-ion energy storage batteries suggest that consumption and domestic production of lithium-ion batteries increased. The data also indicate continued competitive pressure from imports.

## Solar container lithium battery packs exported to the United States

### [U.S. Tariffs on Chinese Lithium Batteries: Full ...](#)

U.S. tariffs on Chinese lithium batteries in 2025 impact costs, supply chains, and EV, energy storage, and electronics industries globally.
