

# Solar energy storage in Ethiopia

## Overview

---

Is solar a viable option in Ethiopia?

But our previous study identified that the policy makers in Ethiopia believe that solar is too costly and not a viable option . The current electricity tariff in Ethiopia is highly subsidized and one of the lowest in Africa. The tariff depends on the monthly energy consumption and varies among user classification.

Can solar power transform Ethiopia's energy landscape?

Among these, solar energy emerges as a beacon of hope, poised to transform Ethiopia's energy landscape and drive socioeconomic development. Significantly, the country has relied heavily on hydropower, which accounts for more than 90% of its electricity generation.

Does Ethiopia have solar power?

According to the researches, Ethiopia is blessed with an abundance of sunlight, receiving an average of 5.5 to 6.5 kWh/m<sup>2</sup>/day throughout the year, This vast solar potential, coupled with declining costs of solar technology, provides a significant opportunity for the country to harness clean energy.

Is there a private investment in solar power plants in Ethiopia?

However, there was no private investment in solar power plants in Ethiopia. Mainly the Ethiopian Electric Power Corporation (EEPCo) has been a state-owned and vertically integrated monopoly that controls the market from generation to selling of electricity throughout the country .
