

# Solar glass inventory backlog

## Overview

---

What is solar inventory?

Solar Inventory is inventory carried by solar companies and can include: The management of solar inventory comes with some specific challenges which it shares with other highly innovative industries which experience similar demand & price volatility and technological disruption.

What are the best techniques for solar inventory management?

The best techniques for solar inventory management are the Reorder point formula, Consignment and Safety Stock. Solar Inventory includes inventory management of solar modules, solar cells, PV materials, solar paste, silicon wafers, frames, backsheets, junction boxes, PV glass, PV Equipment, PV connectors and racking & mounting.

Is solar inventory a 'yes-to-be-sold' cost?

Regardless, the safest bet is to limit the amount of inventory you carry that's not directly for a sale order that you have in your hand. So, one of the key objectives of inventory planning is to help preserve your capital by limiting the amount of "yet-to-be-sold" inventory. When it comes to solar inventory, Storage is a non-negligible cost.

What happens if solar inventory is too high?

Excess solar inventory can very quickly be made obsolete by new technology. Solar inventory can also get devalued because of frequent price drops. Sales cycles are not very predictable because demand is closely linked to consumers' energy bills, price volatility and incentives provided by governments.
