

# Solar panel size in Monterrey Mexico

## Overview

---

How much solar power does Monterrey have?

Seasonal solar PV output for Latitude: 25.6554, Longitude: -100.3258 (Monterrey, Mexico), based on our analysis of 8760 hourly intervals of solar and meteorological data (one whole year) retrieved for that set of coordinates/location from NASA POWER (The Prediction of Worldwide Energy Resources) API: Average 6.98kWh/day in Summer.

Is Monterrey a good location for solar power generation?

Monterrey, Nuevo León, Mexico (latitude: 25.6554, longitude: -100.3258) is a highly suitable location for solar power generation due to the substantial amount of energy that can be produced from installed solar panels throughout the year.

How many solar PV locations are there in Mexico?

So far, we have conducted calculations to evaluate the solar photovoltaic (PV) potential in 147 locations across Mexico. This analysis provides insights into each city/location's potential for harnessing solar energy through PV installations. Link: [Solar PV potential in Mexico by location](#).

What is the market share of solar energy in Mexico?

By 2024, photovoltaic systems held 99.86% of the Mexican solar energy market share, while solar thermal systems for industrial heat are projected to rise at a 37.97% CAGR through 2030.
