

# **Solar panels in Almaty Kazakhstan**

## Overview

---

What does the Almaty solar project mean for Kazakhstan?

The Almaty solar project is a direct manifestation of this commitment, designed to reduce reliance on fossil fuels and support Kazakhstan's national goals of increasing the share of renewables in its energy mix. The environmental impact of the solar plant is expected to be considerable.

How many solar power plants are there in Kazakhstan?

Solar Power: The potential of solar energy in Kazakhstan is estimated at 2.5 billion kWh per year. Solar energy can be widely used in two-thirds of Kazakhstan's territory. The government aimed to put 28 solar power plants into operation by the end of 2021, and met this goal, with currently 51 solar power plants in operation.

Is Almaty a good place to get solar power?

Almaty, Kazakhstan, located at latitude 43.2433 and longitude 76.8646, exhibits a strong potential for solar photovoltaic (PV) power generation due to its geographical location. The city experiences significant sunlight hours throughout the year which allows for substantial energy production from solar panels.

Why is Lukoil building a solar plant in Almaty?

Kazakhstan is boosting its energy capacity with LUKOIL's construction of a 4.95 MW solar plant in the Almaty region. This project is part of LUKOIL's strategy to diversify energy sources and reduce carbon emissions.
