

Solar panels power generation in Jordan

Overview

What percentage of Jordan's electricity is solar?

More than 20 percent of the electricity grid in Jordan is powered by solar or wind energy, with a target of 31% by 2030. Exceeding this percentage will be challenging for Jordan unless storage solutions are implemented.

How many solar panels are installed in Jordan?

According to annual reports by Jordan's grid operators, the total installed on-grid solar PV capacity reached 2,073.86 MW by the end of 2024. This capacity is divided as follows: Distribution System Operators (DSOs): 1,081.86 MW across 74,145 projects. Transmission System Operator (TSO): 992 MW. The largest DSO-managed installations were by:.

How to optimize solar generation in Amman Jordan?

Assuming you can modify the tilt angle of your solar PV panels throughout the year, you can optimize your solar generation in Amman, Jordan as follows: In Summer, set the angle of your panels to 16° facing South. In Autumn, tilt panels to 36° facing South for maximum generation.

Why does Jordan need a solar PV installation & maintenance service?

Since Jordan started the solar PV installation in 2012, the demand for solar PV operation and maintenance (O&M) services increased, driven by aging systems requiring inverter replacements (every 8-10 years) and system optimization.
