

# Solar power with grid backup in indonesia

## Overview

---

Will Indonesia build a 100 GW solar power plant?

Jakarta, August 7, 2025 - Indonesia will build a 100 Gigawatt (GW) Solar Power Plant (PLTS). The program plans to build 80 GW of solar power plants and 320 GWh of Battery Energy Storage System (BESS) to be managed by the Merah Putih Village Cooperative (KDMP) in 80,000 villages, and 20 GW of Centralized solar power plants.

How many solar power plants will be installed in Indonesia?

These solar mini grids are set to be installed in 80,000 villages across Indonesia and will be managed and operated by village cooperative Merah Putih. The initiative also includes plans for 20 GW of centralized solar power plants, featuring both on-grid and off-grid installations.

Will Indonesia deploy 100 GW of solar mainly for solar MNI grid?

The Indonesian government has revealed a new initiative aiming to deploy 100 GW of solar mainly for Solar Mni Grid with accompanying Battery Energy Storage System (BESS).

How many solar-plus-storage mini grids will be installed in Indonesia?

These solar-plus-storage mini grids are set to be installed in 80,000 villages across Indonesia and will be managed and operated by village cooperative Merah Putih. A target of 10,000 becoming operational by August 2025 has been set.
