

# Solar rooftop power generation system in Hanoi

## Overview

---

Does Hanoi city have solar energy potential?

The solar energy potential in Hanoi city was analyzed. A methodology for assessment of rooftop solar power technical potential has been presented. The total installed capacity and the total generated electricity of rooftop grid-tied solar power system in Hanoi city are calculated.

How much electricity can be generated by rooftop solar power in Hanoi?

Our results indicate that, the capacity and electricity values of rooftop solar power in each district in Hanoi are different and the total electricity of 37,591,481.20 MWh per year can be generated by using the rooftop solar power in the city.

How many MW is rooftop solar power in Vietnam?

As of the end of 2024, rooftop solar power in Vietnam contributed over 9,500 MW to the total installed capacity of approximately 103,000 MW. This significant growth underscores the country's commitment to renewable energy. What government policies support rooftop solar power adoption in Vietnam?

.

Which rooftop solar systems can be developed in Vietnam?

According to the provisions of decision 13, only rooftop solar systems directly or indirectly connected to the national grid will be developed after registering for connection with the Vietnam Electricity Corporation or units authorised by the Vietnam Electricity Corporation are eligible.
