

Solar tile 1 square meter

Overview

What are solar tiles?

Solar tiles are roofing materials that can produce energy directly from sunlight. Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof.

How much do solar tiles cost?

Solar tiles provide an appealing alternative. Representatives from a Swiss solar tile company called Freesuns indicate its products are ideal for use on historically significant structures. The tiles generally cost between \$28 and \$30 per square foot. More specifically, the company sells three product styles.

How do solar tiles work?

Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof. Photovoltaic cells in solar tiles turn sunlight into direct current (DC) energy.

How strong are solar tiles?

The solar tiles go above and beyond the highest impact rating of Class 4 impact resistance. One solar company claims that its Solar Tiles are 3x stronger than other roofing materials. The solar tiles have a strong resistance to wind. They are rated for wind speeds up to 130 mph.
