

Sophia New Energy Storage Planning Company

Overview

What is the implementation plan for the development of new energy storage?

In January 2022, the National Development and Reform Commission and the National Energy Administration jointly issued the Implementation Plan for the Development of New Energy Storage during the 14th Five-Year Plan Period, emphasizing the fundamental role of new energy storage technologies in a new power system.

Can new energy storage promote green and low-carbon development?

This year's government work report noted the development of new energy storage as one of the measures to promote green and low-carbon development. New energy storage refers to energy-storage technologies other than conventional pump storage. It offers advantages such as a short construction period, flexible layout and fast response.

Will the energy storage industry thrive in the next stage?

The energy storage industry is going through a critical period of transition from the early commercial stage to development on a large scale. Whether it can thrive in the next stage depends on its economics.

How many energy-storage pilot projects are there in 2024?

At the beginning of 2024, the National Energy Administration released a list of 56 new energy-storage pilot projects. About 30 percent of the projects belong to Lithium-ion battery route, others cover fields of compressed air, flow battery, sodium-ion battery, gravity, flywheel, carbon dioxide, lead-carbon battery and liquid air.
