

# **South Ossetia Power Generation Container House BESS**

## Overview

---

Who is potentia energy?

Image: Potentia Energy. Potentia Energy, a joint venture co-owned by Enel Green Power and INPEX, has secured the first environmental approval for a grid-scale battery energy storage system (BESS) under South Australia's new Hydrogen and Renewable Energy (HRE) Act.

When will potentia energy start construction?

With the SEO approval now secured in August 2025, Potentia Energy is targeting the commencement of construction in late 2026, with projected commercial operation scheduled for early 2028. South Australia's HRE Act, which came into effect in July 2024, represents a shift in how large-scale renewable energy projects are regulated in the state.

How will ElectraNet's 'Bess' connect to the National Electricity Market (NEM)?

The BESS will connect to the grid and the National Electricity Market (NEM) via ElectraNet's Emeroo Substation. The company submitted its License Application for the project to the South Australian government in early 2025, making it one of the first projects to test the new regulatory framework established by the HRE Act.
