

# Specifications and models of China-Africa uninterruptible power supply

## Overview

---

What is UPS (uninterruptible power system)?

UPS (Uninterruptible Power System), that is, uninterruptible power supply, is a constant voltage and constant frequency uninterruptible power supply with energy storage devices and inverters as the main component.

What is a three-phase uninterruptible power supply (UPS)?

Three-phase uninterruptible power supplies (UPS) operate in conjunction with existing electrical systems to provide power conditioning, back-up protection, and distribution for electronic equipment loads that use three-phase power. DC uninterruptible power suppliers are designed specifically for DC systems.

What is a DC uninterruptible power supplier?

DC uninterruptible power suppliers are designed specifically for DC systems. This type of UPS provides continuous back-up for telecommunication, telephone, and other systems that use DC power. All products with ANY of the selected attributes will be returned as matches.

Where can I find uninterruptible power supplies (UPS)?

Find Uninterruptible Power Supplies (UPS) on GlobalSpec by specifications. Uninterruptible power supplies (UPS) are backup batteries that provide emergency power to electrical systems in case power becomes unavailable.
