

# Super battery cabinet base station power generation technology

## Overview

---

Which power supply mode is used for micro base station?

For the micro base station, all-Pad power supply mode is used, featuring full high efficiency, full self-cooling and smooth upgrade for rapid deployment and site construction & operation costs reduction.

How many kWh are in a battery storage container?

Each battery energy storage container unit is composed of 16 165.89 kWh battery cabinets, junction cabinets, power distribution cabinets, as well as battery management system (BMS), and the auxiliary systems of distribution, environmental control, fire protection, illumination, etc. inside the container; the battery container is 40 feet in size.

What makes a reliable communication base station?

The solution adopts new energy (wind and diesel energy storage) technology to provide a reliable guarantee for the stable operation of communication base stations.

What is super high-efficiency & high-density power system?

The new-generation super high-efficiency and high-density power system is used to supply power to 2/3/4G and 5G equipment, thus saving energy and reducing consumption.
