Which capacitor is the best value for buck converter?

Conclusion: looking at the above results, we came to know that 25V 50uF capacitor is the best value of the capacitor to be chosen. This example illustrates the design of buck converter which is maintained down to 10% of the 5A which is the full load current. Given parameters Output voltage of the system is $V_o = 12V$ Input voltage of the system is.
