

Supplier of 120-foot photovoltaic shipping containers for research stations

Overview

What is a mobile solar container portable PV power station?

Introducing our cutting-edge solution for sustainable energy production: the Mobile Solar Container Portable PV Power Stations. Available in both 20ft and 40ft variants, these innovative containers are designed to revolutionize the way we harness and utilize solar power.

What are mobile solar containers?

Available in both 20ft and 40ft variants, these innovative containers are designed to revolutionize the way we harness and utilize solar power. Efficient Solar Power Generation: Our Mobile Solar Containers are equipped with high-efficiency solar panels that capture and convert sunlight into clean, renewable energy.

What is a solarcontainer?

The Solarcontainer is a photovoltaic power plant that was specially developed as a mobile power generator with collapsible PV modules as a mobile solar system, a grid-independent solution represents. Solar panels lay flat on the ground. This position ensures maximum energy harvest Panels lays flat on the ground.

How many households can a solar Container Supply?

Based on an average power consumption of a 4-person household of 4000 kWh per year and a location in Southern Germany, the solar container can supply approx. 32 households with climate-friendly electricity. At a location in Southern Europe it can even be up to 50 households due to the high solar radiation.
