

Top drive electric control system inverter cabinet

Overview

Which frequency inverters are suitable for control cabinets?

We have developed the NORDAC PRO family of frequency inverters especially for installation in control cabinets. These inverters are equally suitable for operating synchronous and asynchronous motors and meet all conceivable customer requirements thanks to a wide range of options.

How much power does a control cabinet inverter have?

Our inverters for control cabinet installation have a power range from 0.25 to 160 kW and can be extended with optional plug-in modules. Variable cooling concepts ensure optimum heat dissipation. Why Inverters for control cabinet installation from NORD?

.

What is frequency inverter?

Frequency inverter is a dedicated accessory of inverter cabinet ,the variable frequency control the speed and the main technical parameters depends on the specification of built-in inverter and external configuration. Inverter cabinet have big difference according to the use of different application and different functions.

What is a safety nordac pro frequency inverter?

SafetyNORDAC PRO frequency inverters have a comprehensive safety concept for all drive components. PrecisionPosicon positioning control not only provides high precision point-to-point positioning of the drive independent of the control unit, but also the possibility of relative positioning of endless loop axes.

Top drive electric control system inverter cabinet

[Inverters for control cabinet installation](#)

NORD inverters are the solution for drive tasks in numerous applications installed all over the world. Thanks to the integrated PLC, our technology reduces the load on the higher level ...
