

UK Procurement of Two-Way Charging Containers for Energy Storage

Overview

What is a GivEnergy battery storage container?

Compact, mobile, convenient, and fully customised to your power needs. With a GivEnergy battery storage container, you can house your critical battery assets securely. We can neatly package your large-scale commercial battery storage system in a custom-built container – giving you unparalleled flexibility on its location.

How does an EPC contract work for energy storage projects?

When developing an energy storage project, a project owner can engage an EPC contractor to provide a fully-wrapped EPC agreement that will encompass the procurement, installation, and commissioning of batteries. In many cases, however, owners will contract directly with battery suppliers for battery supply and commissioning.

What are energy storage procurement contracts?

Energy storage procurement contracts must also take into account the ever-evolving suite of laws and regulations applicable to energy storage projects, including as a result of the recent change in administration in the United States.

What is a battery energy storage system?

Battery energy storage systems are a growing cornerstone of the UK's energy infrastructure. These projects carry high technical demands and strict programme pressures, particularly where grid connection and commissioning dates are fixed. We provide complete construction services for battery storage sites across the UK.
