

UK solar rooftop power generation system

Overview

How many rooftop solar installations are there in the UK?

There were 57,000 certified rooftop solar installations in the United Kingdom in the first three months of 2025, the strongest first quarter for more than a decade. The last time Q1 installations were higher was in 2012, when the UK government's feed-in tariff offer drove demand.

Do building regulations support demand for rooftop solar in England?

Building regulations in England support growth in demand for rooftop solar as new-build properties make up significant share of small-scale PV installations. Strong installations in first quarter of 2025 were followed by a new single-day record for UK solar generation in April.

What does the government's rooftop solar strategy mean for the sector?

The Government has now put rooftop solar at the heart of its energy strategy. The roadmap explicitly commits to "unleashing a rooftop revolution", outlining actions to boost installations across domestic, SME, and public sector buildings. Here's what that means for our sector: Barriers are coming down.

Could rooftop solar panels save £500 a year?

Families could save around £500 a year on their energy bills by installing rooftop solar panels as part of the government's rooftop revolution - making working people better off through the Plan for Change.
