What is battery management system?

Battery management system used in the field of industrial and commercial energy storage.

How do we ensure the safety and reliability of battery products?

From core chip selection to system-level architecture, we guarantee the safety and reliability of battery products in an all-round and real-time manner. Through multi-branch design, we fully and fully monitor battery voltage, power, temperature, communication and other states to ensure the normal operation of the power system.

What is uninterruptible power supply (UPS)?

Uninterruptible power supply (UPS) is the last line of defense to ensure the safe and stable operation of the key equipment of the communication base station. There are many stringent requirements on the security and reliability of BMS, and dauntu energy storage has made full preparations.
