

Wind solar and energy storage projects were withdrawn

Overview

Is a solar farm canceled or delayed?

A solar farm in Mona, Utah, on Aug. 9, 2022. More than \$14 billion in clean energy investments in the U.S. have been canceled or delayed this year, according to an analysis released Thursday, as President Donald Trump's pending megabill has raised fears over the future of domestic battery, electric vehicle and solar and wind energy development.

How many power projects were canceled this year?

In a report published Tuesday morning, Cleanview, an organization that tracks energy trends, found that, throughout this year, 1,891 power projects were canceled, with a combined generation capacity of roughly 266 gigawatts.

Why did new power projects get canceled in 2025?

Hundreds of new power projects set to be built over the next five years, including utility-sized solar farms and offshore wind farms, were canceled by their developers in 2025 because of the Trump administration 's crackdown on renewables, pushback from local communities, and difficulties connecting to the broader grid.

What happened to solar power?

Broken down, more than 86 gigawatts worth of utility-scale solar generation capacity was canceled, while the battery storage industry lost roughly 79 gigawatts of capacity, and 54 gigawatts worth of wind projects were slashed.
