

Zhongya supercapacitor module price

Overview

What is a GMCC 174v supercapacitor module?

GMCC's 174V 6.2F supercapacitor module is a compact, high-power energy storage and power transmission solution for wind turbine pitch systems and backup power sources. It is easy to install and maintain, cost-effective, and integrates passive resistance balancing and temperature monitoring functions.

What are GMCC supercapacitor modules?

Based on the top electrical performance such as voltage and internal resistance of GMCC supercapacitor monomers in the industry, GMCC supercapacitor modules integrate a large amount of energy into a small package through soldering or laser welding.

Which supercapacitor module is best for wind turbine pitch systems?

GMCC's 174V 10F supercapacitor module is another reliable choice for wind turbine pitch systems, and can also be used in industrial applications such as small UPS systems and heavy machinery. It has higher storage energy, higher protection level, and meets stricter impact and vibration requirements
